

LINKGUARD™ EXPRESS

Solution Brief

Rapidly Deploy Network Security in Minutes

LinkGuard™ Express is a self-managed cybersecurity solution that is easy to deploy, enables secure hub-and-spoke connectivity between multiple sites and provides secure remote access for authorized users. The solution uses any combination of LinkGuard family of products and Blue Ridge Networks' technology used for over 20 years to protect critical assets and networks in government and industry with no reported breaches.

Benefits:

- Rapid deployment and Easy to manage.
- Overlay solution is protocol agnostic and protects network and devices without the need to modify existing networks.
- No Internet Access Required.
- RemoteLinks can connect an entire network with several IIoT devices.
- All functionality is compatible with isolated, private networks as well as distributed internet configurations.

Features:

- BorderGuard (Hub) component has built-in Management Software, default settings and default security policies for quick rollout. Monitoring features provide system status indicators and log data.
- Includes integrated key management, hardware roots of trust, strong authentication, built-in Public Key Cryptography.
- Data transfers encrypted from the very first packet.
- FIPS and HIPAA compliant.
- Standard package includes 1 BorderGuard (Hub), 2 RemoteLinks (Spokes), 2 Virtual EdgeGuard and 2 LinkGuard Clients for secure 2Factor remote access. Optional upgrades include Industrial RemoteLinks.

Easy and Affordable Secure Connectivity

LINKGUARD™ EXPRESS

Deployment Schematic

The screenshot displays the management interface with the following sections:

- System Information:**
 - Device Name: ACME-BG01
 - Firmware: 6.0.3.1
 - Uptime: 4 days, 2 hours, 43 minutes
- Interfaces:**

Name	IP Address	Mask	Gateway
EXT	78.63.172.34	255.255.255.248	78.63.172.38
MGMT	192.168.0.1	255.255.255.0	undefined
- Admin Login Status:**

Name	IP Address	Session Start	Idle Time
admin	192.168.0.10	10/03/2022 14:48	00:00:23
- Devices Table:**

Status	Device Name	Device Type	IP Address	Description	Policy	VLANs
●	ACME-RL01	RemoteLink (RL)	192.168.20.42	Minneapolis Facility	Default	Default (1), 10, 20, 30, 40
●	ACME-RL02	RemoteLink (RL)	192.168.30.27	Chicago Plant	Minneapolis to Chicago	Default (1), 10, 20
●	ACME-RL03	RemoteLink (RL)	192.168.40.30	Largo Plant	Minneapolis to Largo	Default (1), 10, 20, 30, 40
- Clients Table:**

Status	Username	Device Type	IP Address	Description	Policy	VLANs
●	pveeneman	LinkGuard Client	192.168.20.87	Contractor	Default	Default (1), 10, 20, 30, 40
●	ncanty	EdgeGuard Client	209.23.57.86	Operations	Default	Default (1), 10, 20
●	zkamal	EdgeGuard Client	192.168.40.123	Engineer	Default	Default (1), 30, 40
