**Embedded Devices and IoT/OT/SCADA Lag in Vulnerability Assessments**  
 Vulnerability Assessment Applicability

n = 500  
 Base: Those currently using/planning/evaluating Vulnerability Management. Excluding DK  
 Q: Which of the following does your organization (assess/plan to assess) as part of its vulnerability management process?  
 Source: Gartner

**“The goal is to prevent unauthorized access to data and services and make access control enforcement as granular as possible.”**  
 – CISA | Zero Trust Maturity Model Version 2.0

LinkGuard is a complementary breach prevention, zero-trust cybersecurity solution that delivers defense-in-depth without operational complexity to Users, Devices, Networks/Environments, Data and Automation and Orchestration -- five of the seven pillars for the Zero Trust Reference Architecture.

### ISOLATE

Segmentation limits scope of a security breach and risk of unauthorized access to sensitive data.

### CONCEAL

Hide critical assets to create more resilient environments.

### ENCRYPT

Ensure that data transmitted across unknown or hostile networks is uncompromised and remains confidential.

### AUTHENTICATE

Add an extra layer of security to networks and devices, making it harder for attackers to gain unauthorized access.

## About Us

Blue Ridge Networks is a proven and trusted provider of cybersecurity breach prevention solutions. **Our mission is to provide proactive protection of critical infrastructure that eliminates the adverse impacts associated with reactive responses to compromises.**

Our unique CyberCloak capabilities secure critical assets and operations in zero-trust IT/OT network architectures. Regulated, Commercial, and Industrial organizations have trusted Blue Ridge Networks for over 20 years to prevent exploits and receive continuous returns on their investments while achieving uninterrupted operational efficiency.
