

### **SOLUTION BRIEF**

# LinkGuard<sup>™</sup> Express Rapidly Deploy Network Security in Minutes

**LinkGuard™ Express** is a self-managed cybersecurity solution that is easy to deploy, enables secure hub-and-spoke connectivity between multiple sites and provides secure remote access for authorized users. The solution uses any combination of LinkGuard family of products and Blue Ridge Networks' technology used for over 20 years to protect critical assets and networks in government and industry with no reported breaches.

### **KEY FEATURES**

- BorderGuard (Hub) component has built-in Management Software, default settings and default security policies for quick rollout. Monitoring features provide system status indicators and log data.
- Includes integrated key management, hardware roots of trust, strong authentication, built-in Public Key Cryptography.
- Data transfers encrypted from the very first packet.
- FIPS and HIPM compliant.
- Standard package includes 1 BorderGuard (Hub), 2 Remotelinks (Spokes), 2 Virtual EdgeGuard and 2 LinkGuard Clients for secure 2Factor remote access. Optional upgrades include Industrial RemoteLinks.

### **BENEFITS**

- Rapid deployment and Easy to manage.
- Overlay solution is protocol agnostic and protects network and devices without the need to modify existing networks.
- No Internet Access Required.

- Remotelinks can connect an entire network with several lloT devices.
- All functionality is compatible with isolated, private networks as well as distributed internet configurations.

## **About Us**

Blue Ridge Networks is a proven and trusted provider of cybersecurity breachprevention solutions. Our mission is to provide proactive protection of critical infrastructure that eliminates the adverse impacts associated with reactive responses to compromises.

Our unique CyberCloak capabilities secure critical assets and operations in zero-trust IT/OT network architectures. Regulated, Commercial, and Industrial organizations have trusted Blue Ridge Networks for over 20 years to prevent exploits and receive continuous returns on their investments while achieving uninterrupted operational efficiency.
