

Dragos & Blue Ridge Networks: Threat Monitoring and Mitigation

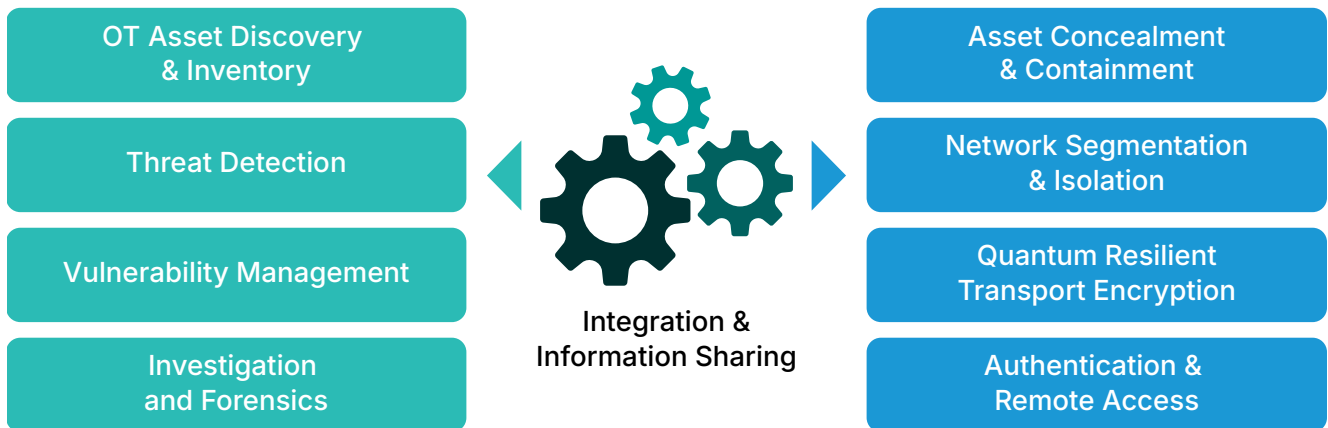

OT/ICS Layered Defense for Critical Infrastructure

The Challenges

Digital transformation within industrial environments, enterprises, and critical infrastructure continues to drive the convergence of IT and OT data, systems, and services. The result is an increase in attack surface, threat vectors, and potential asset exposure, stronger monitoring, threat detection, and mitigation strategies.

The Solution

By integrating Dragos and CyberCloak, organizations can establish a multi-layered defense framework that spans both network-level and endpoint-level security. The Dragos Platform with deep OT monitoring and threat intelligence provides comprehensive visibility, while CyberCloak's advanced isolation and containment techniques add an additional layer of protection against threats.

The Benefits

Organizations can benefit from a layered defense from the combination of the Dragos Platform and Blue Ridge Networks CyberCloak solutions to preemptively secure critical infrastructure and industrial control systems. Led by Dragos's deep OT monitoring covering 2,500+ protocols and asset discovery/ inventory across OT/IT devices and adding CyberCloak's zero-trust segmentation, you can achieve comprehensive visibility and protection for your ICS/ OT networks.

Partnership Highlights

Architecture & Visibility

- Full asset profiling across OT, IT, IoT, and IIoT devices
- Zero-trust segmentation
- Policy-driven zoning

Remote Access & Third Parties

- Hardened vendor access
- Maintenance windows without exposure

Securely Accelerate Digital Transformation

- Centralized management and streamlined operations
- Easy to deploy, manage, and operate
- Rapid scalability and compatibility
- Cost effective and efficient operations

Detection, Response, & Containment

- Ransomware blast-radius control
- OT Watch Complete
- 24x7 containment

Threat Intelligence & Collective Defense

- Industry leading OT Cyber Threat Intelligence
- Weekly threat intelligence updates
- Neighborhood Keeper anonymous cross-industry threat sharing

About Dragos, Inc.

Dragos safeguards civilization from those trying to disrupt the industrial infrastructure we depend on every day. Headquartered in the Washington, DC area with global operations across North America, Europe, the Middle East, and Asia-Pacific. About Blue Ridge Networks

Blue Ridge Networks is on a mission to deliver resilient, seamless, and efficient preemptive zero trust protection for critical assets, data, and operations. CyberCloak solutions utilize unique Data Privacy Facility (DPF) technologies with your OT/IT infrastructure and tools to reliably segment and control access for critical network operations.
